

WELDLINE

OPTICLEAN II

OPTICLEAN II

New inverter-technology installation
for cleaning, polishing and marking of stainless steel.
Use on TIG welding beads.

**INVERTER
TECHNOLOGY
FOR TIG WELDS**

**POWERFUL
450 W**

1 CLEANING

Place the cleaning solution onto the torch and choose whether you want to use the pad or the brush, which gives better access to angles that are difficult to reach. Rub the weld till its colour becomes clean.

2 POLISHING

Place the polishing solution onto the torch and choose whether you want to use the pad or the brush. Rapidly, as you rub the weld, it will start to shine. Wipe your steel with a cloth rag in order to avoid stains.

3 MARKING

Take the appropriate suitcase containing both marking and eroding electrolytes.

Rub the marking felt moistened with the electrolytic solution on the screen printing frame. Your logo is printed on the metal.

Standard dimensions range from a minimum of:

25 x 15 mm / 54 x 32 mm / 85 x 54 mm / 128 x 42.5 mm / 170 x 54 mm.

YOUR BENEFITS

GAIN OF PRODUCTIVITY

No need to dip the pump into the liquid and to interrupt the operation several times.
Improvement of the quickness while increasing current.
Efficiency increased with the carbon blush.

ECOLOGICAL

No need to wear gloves or protective masks with the neutral solution.
Large outdoor areas are not required: no toxic vapor emissions, no need for water treatment plant.

ECONOMIC

No passivation after cleaning.

AESTHETIC

No stains on the steel after cleaning.
