# Plasma range PRESTOJET / PLASMAJET

A complete range of installations  
for manual plasma cutting and gouging

2008-044

# The plasma expert

## The plasma process

### Principles

Plasma arc, created from a combination of direct electric current and gas flow, is strongly constricted by a nozzle which gives the resulting jet formidable, thermal and kinetic energy. The transfer of this energy to the part to be cut results in localized melting of the metal and its ejection from the cut.

2007-981\_ref

### Performance

To maximize the service life of the wear parts: electrodes, nozzles and guide shoes, it is important to pay close attention to the conditions for piercing in mid-plate, and also to the main cutting parameters. The correct combination of settings, according to the thickness to be cut - power, nozzle diameter, gas flow rate, separation distance, speed of movement of the torch - yields optimum results in terms of width of cut, lead angle, spatters and smooth cut surface with very little dross.

### Plasma gouging

The plasma gouging process is performed with a standard plasma cutting torch by only changing the nozzle, the skirt and the skate. Using the same principle of plasma cutting it

2000-145

allows metal to be removed in an efficient, precise and clean way.

### Benefits:

- reduced noise and smoke compared with other thermal gouging methods,
- high metal removal rate (up to 12 kg / hour) with superior precision,
- reduced risk of carbon contamination compared with the arc gouging process,
- possibility to gouge ferrous and non-ferrous metals.

### Drag cutting

2007-982\_ref

The direct contact between the cutting nozzle and the workpiece provides several benefits in comparison with the "distance cutting" method. This particular position allows most of the smoke, spatters and arc radiation to be kept under

the metal sheet thus protecting the operator.

The result of a drag cut is very clean and the resulting kerf is a much more narrow, superior precision quality cut. The drag cutting process is ideal up to 8 mm thickness for all those applications where accuracy is required.

### Capacity

*Plasma cutting equipment is characterized by the thicknesses that it is capable of:*

- Piercing in mid-plate, with minimum risk for nozzles and guide shoes.

3566-04

- Cutting with satisfactory quality and a comfortable cutting speed.

3566-06

- Separation cutting at the limits of capacity.

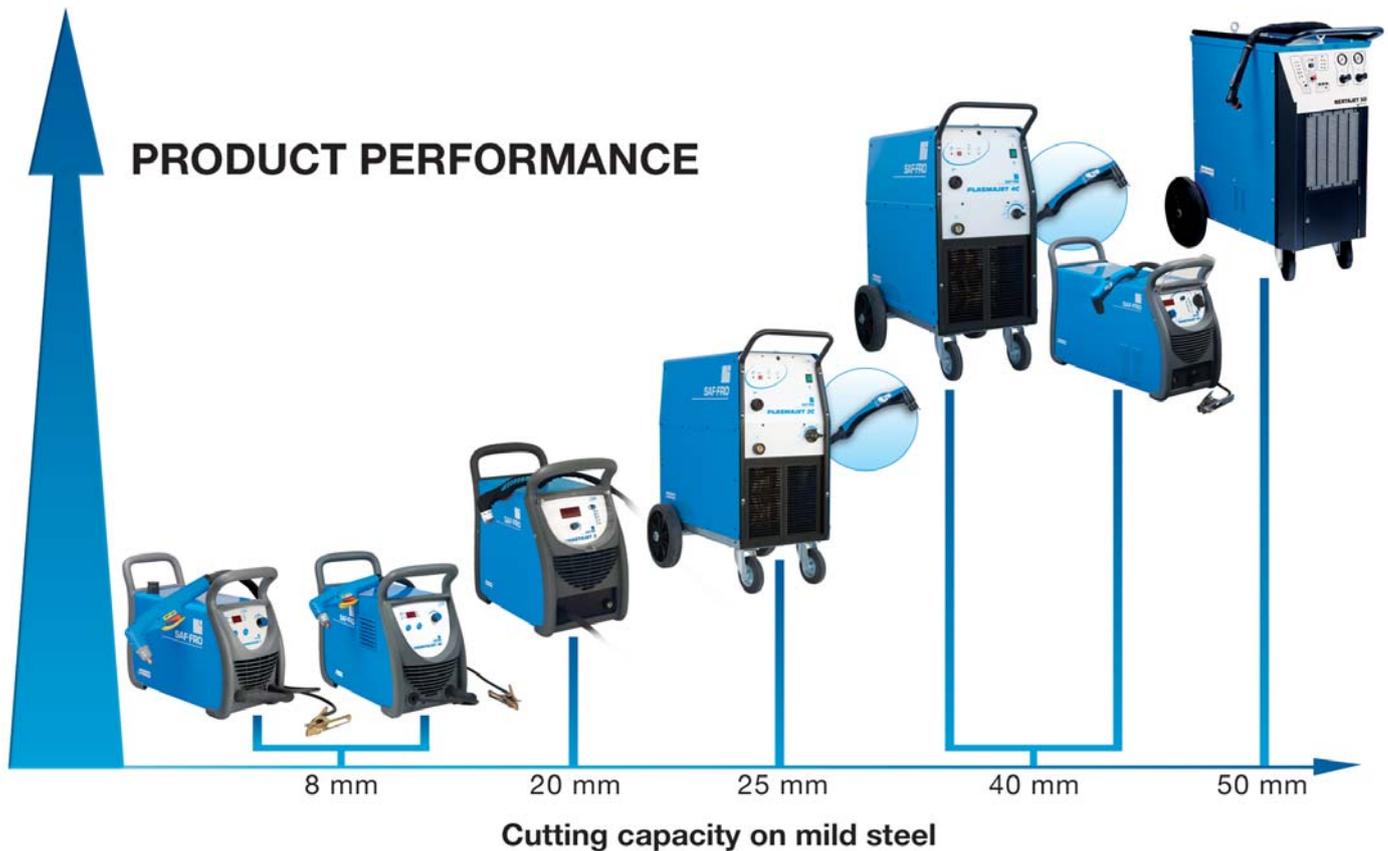

3566-05

### Selection table

Product name	Main supply	Weight	Dimensions (mm)	Output current	Duty cycle @ 40° C	Digital Display	Gouging	Auto. version	Cutting gas	Technology	Cooling
<b>PRESTOJET 1K</b>	1-ph 230 V	16 kg	470 x 205 x 370	10 - 30 A	30 A - 25%	Yes	No	No	Air	Inverter	Air

# PRESTOJET 1K-single phase portable cutter

It is the portable solution with built-in air compressor for manual plasma cutting. Some of the user benefits are: a built-in air compressor to cut everywhere with just a 16 A domestic plug, possibility to regulate the cutting current up to 30 A (to cut up to 10 mm - severance cut on carbon steel). The digital display of the parameters allows an easy and precise interface to achieve the best results in a simple way. All this performance and only 16 kg, it is the lightest unit on the market.

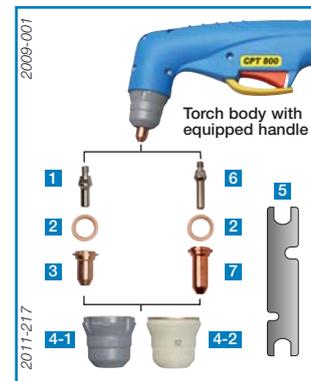

## PRESTOJET 1K

### Product features

- High tech: microprocessor control and digital display.
- High quality contact cut, genuine cut up to 8 mm and severance cut up to 10 mm.
- Low air and current consumption.
- Increased safety due to the patented features of its new torch.
- Light: easy to transport everywhere, (only 16 kg).
- No HF: starting with blow-back prevention from HF pollution.
- Long nozzle and electrode for angle cutting.

## WEAR PARTS BOX

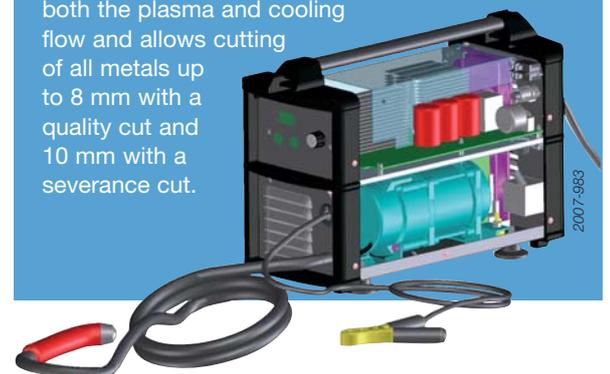

Cat n°: W000277610

Technical characteristics		<b>PRESTOJET 1K</b>
Primary input	Single phase input	230 V +/- 10% - 50-60 Hz
	Effective consumption	11.5 A
Output	Cutting current	10 - 30 A
	Duty cycle at 40 °C	30 A at 25%
Protection index		IP 23
Insulation class		H
Standards		EN 60974-1 ; EN 60974-7 ; EN 60974-10
Dimensions (l x w x h)		470 x 205 x 370 mm
Net weight		16 kg
<b>To order</b>

## INTEGRATED COMPRESSOR TECHNOLOGY

With the reduction of size and weight for compressors and inverter power sources it is now possible to produce a new generation of plasma units needing only a 16 A power supply to cut. The built-in compressor provides the air for both the plasma and cooling flow and allows cutting of all metals up to 8 mm with a quality cut and 10 mm with a severance cut.

# PRESTOJET 1

This lightweight set provides a cutting current up to 30 A, to cut with genuine quality up to 8 mm (severance 10 mm). Controlled by a microprocessor, this electronic unit shows parameters and messages through the digital display. The pressure is measured with an electronic sensor and the inverter technology allows low current consumption. The safety of the operator is assured by the design of the torch and the protection of the trigger.

## PRESTOJET 1

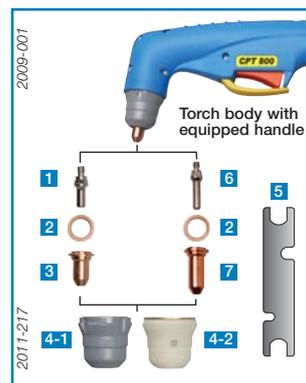

### Product features

- High tech: microprocessor control and digital display.
- High quality contact cut: genuine cut up to 8 mm and severance cut up to 10 mm.
- Low air and current consumption.
- High operator safety.
- Light: easy to transport, weight only 8 kg.
- Reliable and strong: robust design.
- Long nozzle and electrode for angle cutting.

## INVERTER ADVANTAGES

The inverter technology provides at least 3 decisive advantages that assure a very quick pay-back for this kind of installation:

- High efficiency (~99%) and low power consumption, around 30% less than an equivalent transformer.
- Light weight (4 times less than a traditional unit) and small size, with the possibility to carry the units and move them easily for flexible on-site use.
- Continuous current setting with flat DC current that gives a superior quality cut with a very smooth cut surface.

# PRESTOJET 2: the power of technology

With its portability and high power, this new unit is perfect for all maintenance operations. The duty cycle at 40 °C allows use for heavy duty operations, including automatic applications and gouging. The autolink feature and the digital display give the maximum flexibility together with top performance.

## PRESTOJET 2

### Product features

- High quality cut due to the patented SAF-FRO technology.
- Heavy duty cycle 50% at 40 °C for intensive applications.
- Autolink function (automatic setting of the net supply 230 V or 400 V).
- Light (25 kg), small and powerful (up to 20 mm thickness).
- Easy to use due to the digital display.
- Gouging possibilities.

### PRESTOJET 2 - Front panel

1. Cutting mode
2. Grid cutting
3. Gouging
4. Air pressure setting
5. Alarm indicator
6. Reset button
7. Setting knob
8. Digital display

Technical characteristics		PRESTOJET 2
Primary input	Input voltage three phases	230 V - 400 V +/- 10 % with autolink 50/60 Hz
	Max. input current at 400 V	15.5 A
	Max. input current at 230 V	14 A
Output	Cutting current	20 - 65 A
	Duty cycle at 40 °C 400 V	65 A at 60%
	Duty cycle at 40 °C 230 V	50 A at 100%
Compressed air		5 bars - 180 l/min
Protection index		IP 23S
Insulation class		H
Standards		EN 60974-1 ; EN 60974-7 ; EN 60974-10

- Light
- Powerful
- Flexible
- Robust

## BLOW-BACK “CLEAN STARTING” ADVANTAGES

Blow back technology, based on the movement of the electrode during the ignition phase, is much cleaner and safer compared with traditional High Frequency starting.

“Clean” because the electromagnetic emissions are at a minimum level, which means protection for other electronic devices such as computers, NC machines.

“Safe” because there is no risk of high frequency dispersion and of interference with other machines.

Plasma gouging

# PRESTOJET 4C, the top performer

PRESTOJET 4C is the most powerful unit on the market based on advanced inverter technology. With 120 A at 60% duty cycle at 40 °C, it is the ideal solution for intensive applications up to 40 mm thickness. This superior performance and the quick torch connection also allows it to be used for automatic applications.

The digital display provides a precise and repeatable control of the cutting parameters to achieve the maximum quality.

## DIGITAL CONTROL AND DIGITAL DISPLAY ADVANTAGES

- Repeatability of the parameters.
- Precise current and pressure control.
- Possibility to display the machines parameters, such as internal temperature or primary supply voltage for total control of the process.
- Easy interface and messages from the machine for warning purpose assuring high safety and reliability.

## PRESTOJET 4C - Front panel

1. Digital display.
2. Setting knob.
3. Reset button.
4. LEDs of operating mode.
5. On/Off switch.

## PRESTOJET 4C

### Product features

- Lightweight (35 kg).
- Cuts up to 40 mm.
- Perfect quality cut due to patented consumables.
- Quick connection torch for easy maintenance.
- Gouging position.
- Digital display for ease of use.
- Heavy duty cycle 60% at 40 °C.
- Automatic version.

Technical characteristics		PRESTOJET 4C

# PLASMAJET 2C and 4C - 3 ph industrial cutters

With this machine using proven traditional technology, cutting is simpler and safer than ever. Delivered ready to use with cutting torch, air hose and wear parts starting set.

The selection of one of the 3 steps allows cutting up to 25 mm on carbon steel. Its heavy duty cycle 40% at 40 °C makes it suitable for intensive applications. And the IP 23 protection index indicates that this unit is suitable for outdoor use.

## PLASMAJET 2C

### Product features

- Powerful: 80 A with 40% at 40°C duty cycle.
- 3 steps to simplify the selection of the right current according to the thickness to be cut.
- Maximum quality and safety with the patented torch.
- Drag cutting up to 8 mm for maximum quality.
- Delivered ready to use.
- IP 23 for use on outdoor sites.
- 4 wheels and a strong design for intensive industrial use.
- Central connector for easy connection.

Technical characteristics		<b>PLASMAJET 2C</b>
Primary input	Input voltage 3 phases	220/230/380/400 V - 50-60 Hz

### TRANSFORMER TECHNOLOGY ADVANTAGES

- Reliable due to its power circuit, without electronic components.
- Easy to repair.
- Easy to use and to set with the current step selector.

Cutting capacity up to 40 mm thick carbon steel with 50% duty cycle at 40°C makes this unit a unique combination of power, reliability and simplicity.

The transformer technology, coupled to the new JET CP, assures the best cutting quality at a very attractive price.

## PLASMAJET 4C

### Product features

- High cutting capacity: 40 mm with 120 A.
- High duty cycle: 50% at 40 °C.
- 4 steps for setting the current according to the thickness to cut.
- IP 23 for indoor and outdoor applications.
- High quality cut with drag cutting nozzles.
- Delivered ready to use with 6m torch, air hose, primary cable, earth cable, starting set of wear parts.
- Central connector for easy connection.

# NERTAJET 50

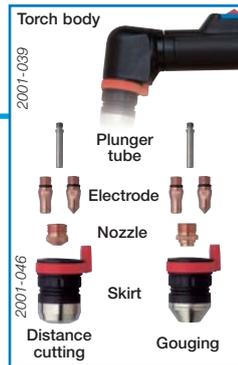

The NERTAJET 50 belongs to the top of the plasma cutting range. With its 100% duty cycle up to 150 A, it is possible to cut a 50 mm thickness. In addition, this power source can be used for automatic applications with the adapted liquid cooled torch.

One of the several advantages is the possibility to use an Argon-Hydrogen mix to cut stainless steel and aluminium with the maximum quality. An efficient set for plasma gouging is also available.

## NERTAJET 50

### Product features

- 150 A at 100% to cut up to 50 mm.
- Built-in liquid cooling unit.
- Possibility to cut with compressed air, Nitrogen and Argon/Hydrogen for maximum quality.
- Double flux to protect the cutting zone.
- Gouging option.
- Automatic cycle version available.

Technical characteristics		<b>NERTAJET 50</b>
Primary input	Input voltage 3 phases	230/400/415/440 V - 50-60 Hz
	Max. input current	108.8/62.6/60.3/56.9 A

Net weight		260 kg
<b>To order</b>		
Power source only		W000305077
Package air including a power source, a torch 6 m, a 3 m earth cable with clamp, a 5 m air cable, a set of wear parts, protection kit		W000305078
Package Ar/H <sub>2</sub> & N <sub>2</sub> including a power source, a torch 6 m, a 3 m earth cable with clamp, a 5 m air cable, a set of wear parts, protection kit		W000305079
	Plunger tube	W000138241
	Key NERTAJET 50	W000138242
	Electrode Air	W000325063
	Electrode N <sub>2</sub>	W000325064
	Electrode Ar/H <sub>2</sub>	W000325065
	Nozzle 40 A	W000325067
	Nozzle 60 A	W000325069
	Nozzle 100 A	W000325072
	Nozzle 150 A	W000325073
	Nozzle for gouging	W000302515
	Skirt P flat	W000302516
	Skirt C conical	W000302517
<b>Adds-ons</b>		
	Wear parts box air	W000302564
	Wear parts box Ar/H <sub>2</sub> and N <sub>2</sub>	W000302565

### NERTAJET 50 Front panel

1. Red warning LEDs.
2. Process selection: cutting, sheet perforation, gouging.
3. Green LEDs: for powering with 3 phases.
4. Current range selector.
5. Push buttons for gas test.
6. Pressure gauges: arc pilot gas/cutting gas.

### Trigger's positions.

The standard position of the trigger is in the front part of the torch for precision cutting.

One movement slide back of the trigger to protect the hand from heating during maximum intensity applications.

+/- 45° torch head rotation for bevel cutting or gouging.

Double action trigger for maximum safety.

# Options and accessories

2007-897

2011-455

2007-888

## Longer torches

2007-119

**Torch JET CP 40C - 15 m for PLASMAJET 2C, 4C and PRESTOJET 4C**  
Cat n°: W000274855

**Torch CP 2.5 - 12 m for PRESTOJET 2**  
Cat n°: W000302640

2007-995

## Plasma trolley

Cat n°: W000372274

Cat n°: W000265598

## Automatic torch

2007-898

**Simple version OCP100S CC - 10 m**  
For machines with central connector - Cat n°: W000370641

## Compass for all torches

2007-892

Cat n°: W000302512

## Complete wear part list

Air Liquide is the world leader in gases for industry, health and the environment, and is present in over 80 countries with 43 600 employees. Oxygen, nitrogen, hydrogen and rare gases have been at the core of Air Liquide's activities since its creation in 1902. Using these molecules, Air Liquide continuously reinvents its business, anticipating the needs of current and future markets. The Group innovates to enable progress, to achieve dynamic growth and a consistent performance. Air Liquide combines many products and technologies to develop valuable applications and services not only for its customers but also for society.
